How to find stock symbols and companies:

There are many places to find stock symbols and company info.

You can open a newspaper to the business section and get yesterday's stock quotes...or...

You can visit <http://finance.google.com/> (or any other stock site) and get up to minute stock quotes.

1. Go to <http://finance.google.com> and type any company in the search bar. If the company is traded on the stock market, they will have stock symbols next to their name.
